Professional Summary

Entry-level AI and Machine Learning Engineer with a background in Electronics and Communications Engineering. Skilled in Python, data analysis, machine learning, and building practical AI applications using NLP, RAG basics, and Streamlit. Seeking junior opportunities in AI, machine learning, data analysis, or applied data projects.

Technical Skills

Programming: Python, SQL basics

Data Analysis: Pandas, NumPy, Matplotlib, Data Cleaning, Data Visualization

Machine Learning: Scikit-learn, Classification, Regression, Model Evaluation

AI / NLP: Transformers, Hugging Face, RAG basics, LangChain basics

Tools: Git, GitHub, Streamlit, FastAPI basics, Azure AI basics

Selected Projects

Nabd / Medical RAG Assistant

Live Demo

Python, LangChain, FAISS, Hugging Face, Streamlit

- Built a document-based AI assistant that uses retrieval techniques to answer questions from medical documents with relevant context.
- Implemented document ingestion, chunking, embeddings, vector search, and a simple Streamlit interface for practical question answering.

Talk to Your Data Analytics Platform

Python, Streamlit, Pandas, LangChain

- Developed a data analytics application that allows users to upload CSV files, explore datasets, generate charts, and ask basic natural-language questions.
- Used Python data analysis tools to support data cleaning, visualization, and simple insight generation for tabular data.

Machine Learning Classification Project

Python, Scikit-learn, Pandas, Matplotlib

- Built and evaluated supervised machine learning models using preprocessing, feature engineering, training, and model evaluation techniques.
- Applied classification workflows and performance analysis to improve understanding of real-world machine learning pipelines.

More projects are available on my portfolio and GitHub.

Education & Professional Training

Bachelor of Electronics and Communications Engineering

Jul 2018 – Aug 2023

Institute of Aviation Engineering and Technology (IAET)

Giza, Egypt

- Graduated with Excellent with Honors.
- Degree recognized by Germany's Central Authority for Foreign Education (ZAB).

AI & Data Science Intensive Diploma

Jan 2024 – Jun 2024

Digital Pioneers Initiative – MCIT / Egyptian Military Academy

Cairo, Egypt

- Completed intensive training in machine learning, deep learning, NLP, computer vision, and Azure AI.
- Built practical projects using Python, Scikit-learn, TensorFlow/PyTorch, Hugging Face, and MLflow basics.

Artificial Intelligence Intern

Aug 2022 – Sep 2022

Telecom Egypt (WE)

Cairo, Egypt

- Applied basic machine learning and computer vision workflows including preprocessing, model training, and evaluation.

Certifications & Publication

- Microsoft Certified: Azure AI Fundamentals (AI-900).**
- AWS Agentic AI Demonstrated.**
- IEEE Conference Paper:** Co-authored a paper on Digital Twin simulations for connected and automated vehicles.

Languages

Arabic: Native | **English:** Upper-Intermediate (B2) | **German:** Intermediate (B1)
